

Butterfly in the Blood

This is a story about revolution. A story about love. A story about freedom. London in the year 2075 is a city of suspicion and betrayal. England has fallen into darkness, closed off from the rest of the world. Romany works within the heart of the oppressive government she hopes to overthrow. A deadly threat to their regime, hidden beneath the noses of those in power; Romanys life hangs in the balance as she fights to get close to the charismatic Prime Minister and bring the Revolution to victory. Romanys childhood rivalry with the Revolutions leader, Beckett, creates a fracture in their lifelong love as she questions his methods, defying his authority. Torn between her love and loyalty towards the boy she once knew and her own conscience, Romany begins to question the price she must pay for freedom.
