

## MYRA-HATI: Crossed Paths

In the second half of the 21st century, the world witnesses the creation of plugs. These are devices created by Japanese scientists, which record the five human senses. With the help of these devices people record their own life experiences in order to relive them at any time and they can share them with others. When shared with a friend or acquaintance, the receiving mind feels the experiences as if they were their own. In a short time these devices become a worldwide phenomenon and that is where trouble begins. Entertaining and illusive novel.
