

Thanatos, Shame and Other Essays (The Harris Meltzer Trust Series)

Pentti Ikonen and Eero Rechartt are well known in Scandinavian psychoanalysis: they have been welcome discussants of others work, but above all they have come up with their own original ideas. Their most thought-provoking contribution is a new interpretation of Thanatos (the death drive), which forms the core of this book. In Scandinavia, Ikonens and Rechartts thinking has opened up a totally new perspective not only on aggressiveness, but also on phenomena like narcissism and shame. Their contribution has cleared up theoretical problems and has proven clinically very helpful. Written in a lucid language, these texts will speak to readers from a variety of professional backgrounds.
