

Satisfying the Alpha (An Unbreakable Fever Book 2)

Twenty-four-year-old Eli Black is the powerful Alpha of The North Carolina Shifter Pack. He is struggling to adjust to his new powers and control his pack when his first Alpha heat hits him hard. Its up to his young human mate, Darius, to help him through it, while trying to keep it quiet that the newly appointed Alpha is in a weakened state. But fate has other plans, Elis heat runs deep and Darius struggles to break it. With rumors of a wandering pack heading their way, time becomes something precious as Darius races to restore his Alpha to his former glory. Part Two: After getting temporarily stranded in the woods with his Alpha in heat, Darius finds himself trying to calm the rampant werewolf, all the while worrying about what this means for the pack. Like a good mate, he tries to take him home without drawing any attention to him, but Eli has something else in mind.
